Giorgio Torre

Software Engineer

I channel my energy and creativity into crafting reliable, maintainable software solutions for diverse industries. With over a decade of experience as a project manager and software engineer in Germany and the UK, I am recognised for my business acumen, project ownership, and excellent communication and teamwork skills. I am a self-driven learner, committed to mastering new skills and enhancing my expertise. I hold a MSc in Engineering Management from the University of Pisa (IT) and a MSc in Manufacturing from Cranfield University (UK).

Work Experience

May 2024 - Present ORBIT Digital (Part of Etribes) Software Engineer

As a member of the Business Building and Innovation Unit at ORBIT, I work within an interdisciplinary team to deliver performant and reliable digital products that actually work. I contributed to multiple product developments, leveraging my technical expertise, project ownership, and refined communication skills. This ensured not only fast feature delivery but also an excellent customer experience for long-lasting relationships.

Tech stack: TypeScript, Nuxt3, NestJS, TailwindCSS

January 2023 - April 2024 Tenhil GmbH & Co KG Software Developer

Key player of the Headless Team, shaping and developing a versatile web app aimed at building multiple job portals via a unified code base by managing content and theming within an headless CMS. Closely collaborated with project PO, ensured top-tier code quality, proposed UI/UX/DX improvements and optimisation.

Tech stack: NextJS, TypeScript, Redux, RTK, Styled Components, C#, .NET Framework

December 2020 - December 2022 stellenanzeigen.de GmbH & Co KG Freelancer & Junior Software Developer

Key member of the Core Team, focused on feature delivery, bug fixing, and developing a standalone CMS seeding console app. Followed Scrum process and agile methodologies.

Tech stack: C#, .NET Core, jQuery, Less

September 2016 - May 2021 Bombardier Transportation UK (later Alstom) Project Commercial Manager

Managed and drafted maintenance contracts with substantial financial implications, ensuring operational efficiency, good customer relationship and cost-effectiveness.

Featured Projects

Wedding Website [<https://www.giorgio-laura.com/>]

Remix.run / TailwindCSS / TypeScript / Vercel

Crafted this website before our wedding to avoid the chaos of managing RSVPs via text. Dove into a new stack, Remix.run, TailwindCSS, and Typescript. Multilanguage support and authentication via session cookies. [pwd: Hir3Me!D]

Personal Portfolio [<https://giorgio-portfolio-towerbrother.vercel.app/>]

Remix.run / TailwindCSS / TypeScript / Vercel

Crafted this website as my digital resume. Minimalist vibes, powered by Remix.run and styled with TailwindCSS. No frills, just speedy delivery to the world. Hope it sparks inspiration.

Weather App [<https://towerbrother.github.io/weather-app/>]

ReactJS / SASS / TypeScript / OpenWeatherMap API / GitHub Pages

My very first SPA. This app fetches current and forecast data from the OpenWeatherMap API. Users can retrieve weather info for the next 5 days, with the flexibility to view temperatures in both metric and imperial units. Support of native Geolocation API.
