Work Experience

January 2023 - Present
Tenhil GmbH & Co KG

Software Developer

Key player of the Headless Team, shaping and developing a versatile web app aimed at building multiple job portals via a unified code base by managing content and theming within an headless CMS. Closely collaborated with project PO, ensured top-tier code quality, proposed UI/UX/DX improvements and optimisation. [NextJS, TypeScript, Styled Components, C#, .NET7]

September 2021 - December 2022
stellenanzeigen.de GmbH & Co KG

Junior Software Developer

Key member of the Core Team, focused on feature delivery, bug fixing, and developing a standalone CMS seeding console app. Followed Scrum process and agile methodologies. [C#, .NET Core, jQuery, LessCSS]

December 2020 - August 2021
stellenanzeigen.de GmbH & Co KG

Freelancer Software Developer

Contributed remotely to the Core Team focusing on new UI/UX features, addressing bugs and refactoring existing code. [C#, .NET Core, jQuery, LessCSS]

September 2016 - May 2021
Bombardier Transportation UK (later Alstom)

Project Commercial Manager

Managed and drafted maintenance contracts with substantial financial implications, ensuring operational efficiency, good customer relationship and cost-effectiveness.

Featured Projects

Wedding Website [https://www.giorgio-laura.com/]

Remix.run / TailwindCSS / TypeScript / Vercel

Crafte this website before our wedding to avoid the chaos of managing RSVPs via text. Dove into a new stack, Remix.run, TailwindCSS, and Typescript. Multilanguage support and authentication via session cookies. [pwd: Hir3Me!:D]

Personal Portfolio [https://giorgio-portfolio-towerbrother.vercel.app/]

Remix.run / TailwindCSS / TypeScript / Vercel

Crafted this website as my digital resume. Minimalist vibes, powered by Remix.run and styled with TailwindCSS. No frills, just speedy delivery to the world. Hope it sparks inspiration.

Weather App [https://towerbrother.github.io/weather-app/]

ReactJS / SASS / TypeScript / OpenWeatherMap API / GitHub Pages

My very first SPA. This app fetches current and forecast data from the OpenWeatherMap API. Users can retrieve weather info for the next 5 days, with the flexibility to view temperatures in both metric and imperial units. Support of native Geolocation API.
